

## 0 Bibliography

**Figure 0.1:** The authors: [John Adkins](#), Colin Finn, [Charles Kittel](#), [Franz Mandl](#), [Katherine Blundell](#) and [Stephen Blundell](#).

The recommended books are:

[Equilibrium Thermodynamics](#) by John Adkins, CUP (1983) **electronic**.

[Equilibrium Thermodynamics](#) by John Adkins, CUP (1983) hardcopy.  
Very good clear book on thermodynamics.

[Finn's Thermal Physics](#), Fourth edition, CRC (2024), **electronic**.  
Good general book.

[Thermal physics](#), Second edition, by Colin Finn, Stanley Thornes (1998), hardcopy.  
The original version.

[Thermal Physics](#), Second edition, by Charles Kittel, Freeman (1980)

A nice fusion of thermodynamics and statistical physics, hardcopy.

*Concepts in thermal physics*, Second Edition, by Katherine and Stephen Blundell, OUP (2010),  
electronic.

*Concepts in thermal physics*, Second Edition, by Katherine and Stephen Blundell, OUP (2010),  
hardcopy.

Good synthesis of thermodynamics and statistical physics.

*Statistical physics*, Second edition, by Franz Mandel, Wiley (1988) electronic.

*Statistical physics*, Second edition, by Franz Mandel, Wiley (1988) hardcopy.

Good book on statistical physics – more material than is needed.

More specialised references will occur during the module.
